Applicant's election without traverse of Group I, claims 1-22, 31-38, and 44-48, in the reply filed on May 1, 2007 is acknowledged.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-22, 31-38, and 44-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bee (EP 0395145) and Jones (US 5126156) in view of Dippin'Dots

Bee discloses the composition of milk shake including milk, cream, sugar, stabilizers, and flavor, wherein the milk shake is frozen (see entire document, especially Example II).

Jones discloses the conventional freezing of dairy pellets as disclosed by Applicant (see entire document).

The claims differ as to the specific recitation of two pellets.

Dippin'Dots discloses pellets of varying colors and/or flavors (see document).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to combine different pellets as taught by Dippin'Dots in that of Bee and Jones because the mixing of different pellets based on color, flavor etc is conventional in the art.

Applicant is using known components to obtain no more than expected results.
